WELCOME

All courses are divided into two groups: obligatory and elective courses, which usually earn 3 or 5 ECTS (generally, 2 ECTS points are equal to 1 US credit).

Please be kindly informed that:

- 1) Some courses may be limited for Exchange program students.
- 2) Some courses will be opened, only if the required minimum amount of students enroll in a course. In case of insufficient number of students enrolled in a course, students will be asked to select another one during the modification of course enrollment.
- 3) Apart from the obligatory and elective courses, there are also language courses worth 3 credit points each (students may choose from among four foreign languages, Polish as a foreign language is also offered).
- 4) The duration of an average course is thirty academic hours, resulting in classes being held once a week for two hours during any given semester.

We hope potential students will find our academic offer attractive and engaging.

* The catalogue will still be modified.

Semester	Summer

Course description:

The Advanced Qualitative Research course introduces students to the range of methods within social and political sciences. It provides firsthand experience with specific procedures through which social science knowledge is developed. It emphasises the interaction between theory and research. The emphasis will be on general guidelines and concrete techniques.

Students will be expected to work in groups and carry out a small scale research project wherein they generate and analyse data, or work with data already available from some surveys. Teaching will take the form of a mixed lecture and workshop format (project-driven). This course will: (1) familiarise students with qualitative research methods, (2) offer "hands-on" experience to some of the techniques discussed in class, (3) offer an opportunity to select a reading source of interest to critically engage with its methods (to complete BA/MA), (4) give the option to test some research techniques and briefly present the results to the rest of the classmates. Upon completion of this course, students are requested to conduct a small-scale research project that is methodologically informed and understand the general principles and methods involved in doing social research. Students will do the following group tasks: 1. Write a research project proposal (1,500 words) 2. work on research questions and the conceptualisation to design the proper

methods, 3. Give class presentations on the progress of their research (at least once in the term) 3. Submit a final group research report (8000 words by 19th Jan.) Assessment: Student achievement of the stated course objectives will be measured in the form of (1) class presentation/assignments, (2) student participation (3) and research project reports.

All written documentation will further develop the student's understanding of content material presented in course. The student will use APA style referencing when necessary. Submitted assignments will be graded based upon the organization and quality of ideas, presentation (grammar, punctuation, spelling, and APA formatting), and use of evidence and course content to support ideas. The content of written assignments and oral presentations must utilize key concepts and course terminology.

ECTS credits	5
Hours	30
Course type	Elective / Seminar
Academic year	2022/2023
Duration	1 semester
Semester	Winter

Course description:

The course, stretched over 13 meetings, will focus on practical applications of data into everyday journalistic practice. As data becomes ever so often an all-encompassing yet empty world, a shell for everything and nothing, this course will aim at explaining on both theoretical and practical level the meanders of data journalism. We will commence with concepts, as students will be taught what data is what data is not, as well as explained that data journalism does not limit itself to numbers and, as a matter of fact, it reaches way beyond that. Throughout the semester students will learn how to navigate statistical, financial and demographic research - to name only a few examples of areas/dimensions, to which the contents of this course could be applied. First, students will spend some time learning about the nature of data - differences between data, information and news. Subsequently, the course will turn towards abilities aimed at identifying valuable and reliable sources of information. Students will learn how to plug into different public and private data bases and how to apply them in their everyday journalistic practices - including blocks of information when those are not advertised or made available to a wider public. Examination of available data will include information from the realm of politics, economics, development, mass migration, climate change, gender imbalances and many others.

Importantly, the course will be based on two principles. First, although it might seem tautological to a certain extent, it is fundamental to stress that it will still be a course primarily on journalism. That is to say, the journalistic toolkit and methodological approaches to journalism will constitute the basis for teaching and assignments. Students will be presented with a range of forms and formats of journalism and will learn how to construct and critically evaluate them. Writing is an essential skill in every form of journalism, including broadcast and radio, so emphasis will be strongly placed on that in the course. Second, this is not a course on technology, coding or programming - technical aspects of data analysis will be few and far between, as data science as a discipline is a standalone endeavor and merits its own course. Technology is an important, yet not the most important aspect of data journalism, and this principle will be reflected in the teaching of this course.

Additionally, this year the course will also devote significant resources to the topic of the Covid-19 pandemic. As an invaluable source of data, the pandemic brought to light not only a lot of new research, but also the very necessity to use and understand data in public and in journalism. We will focus on how data concerning the pandemic was presented in the media and what kind of effect it had on the general population. Again, data will be fundamental, but only when placed in a wider social context.

The second part of the course will teach students how to debunk myths of false and "sexy" statistics. Those are, in their core, misleading and most often used equivocally by the media for clickbaits - such as "negative

GDP", "negative growth" etc. Students will be also taught and later expected to be able to read and correctly interpret metadata, such as statistics concerning average salaries and unemployment.

A theme that will transpire through the entire course will be an effort to give students the necessary skills to individually find topics for own, independent projects both for long form and short form journalism. In other words - we will learn where is the story in numbers or seemingly irrelevant qualitative research. Students are also going to learn how to make use of academia in journalism and how those two dimensions are intertwined, not mutually exclusive.

Biodiversity and climate change

Semester	Winter

Course description:

An Emphasis on Core Financial Principles to Elevate Individuals' Financial Decision Making Using the unifying valuation framework based on the Law of One Price, top researchers Jonathan Berk and Peter DeMarzo have set the new canon for corporate finance textbooks. Corporate Finance blends coverage of time-tested principles and the latest advancements with the practical perspective of the financial manager, so students have the knowledge and tools they need to make sound financial decisions in their careers. New To This Course: Coverage of The Latest Developments in the Field Specific Content Changes Personalize learning.

Corporate Social Responsibility

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Seminar
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The course aims at introducing students to the ideas, challenges and controversies behind the notion of "corporate social responsibility". After looking at how economic theory treats the issue of "external" effects of business activities, lectures will discuss historical evolution of ways how different stakeholders understand the responsibilities of the corporate enterprise towards society beyond its own shareholders. In this context students will learn about the roles of international labour standards set by tripartite International Labour Organization, United Nations Global Compact and its multidimensional approach to corporate social responsibility, existing OECD and EU guidelines in this area as well as ISO 26000 – guidelines on social responsibility developed by International Organization for Standardization. On the other hand one will look also at changing attitudes of the business world itself and at evolving approaches towards benchmarking business performance. Students will, individually and through group assignments, identify, analyse and discuss economic and social implications of specific various cases of business behaviour with respect to protection of human rights, labour standards and consumer interests, protection of environment, preventing corruption and unfair business practices, and involvement in development of local and global communities.

Critical Thinking

Academic cycle	Bachelor's degree and Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Seminar
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The quality of one's thinking has a direct effect on how one interacts with other people. The goal of our meetings is to gain and exercise tools that will help understand and communicate our thinking better. We will first learn basic concepts. Then, we will comprehend reading and problem solving issues. Next, writing clearly and concisely. Finally, we will learn discussing critically and respectfully.

Decision-Making in International Relations

Academic cycle	Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The aim of the course on Decision-making in International Relations is to allow students to gain insight into the various factors affecting how foreign policy is made and executed. The course will explore topics related to the study of International Relations and Cognitive Psychology covering areas such as the models of decision making in foreign policy, its determinants, domestic and international cultural factors and international media influence. The course will incorporate lectures, discussions and case-studies and will conclude with an exam.

Decolonization and Post-Colonialism

Academic cycle	Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The seminar is designed to help students understand the complex process of colonialism and decolonization. First, we will take a look at both of these key concepts. Then we will examine in short the history of colonialism starting with the "Age of Discovery". Next, we will discuss the decolonization process in different regions of the world. In order to better understand the history, apart from textbooks and academic readings, the students will be invited to read "Heart of Darkness" by Joseph Conrad and watch the movie "Another Day of Life" (based on Ryszard Kapuściński's novel). We will learn about colonialism and slavery and how the

international community has been involved in decolonization process. Finally, we will analyze the current issues resulting from colonialization – and the impact on politics, security and economy. Last but not least, we will take a look at the rights of Indigenous people in today's world. Throughout the course we will have a lot to discuss and debate!

Semester	Winter

Course description:

We live in a time when people leave a digital trace behind them at almost every step. After waking up, we turn off the alarm clock on the smartphone, which records our first activity of the day. We use it to read our favourite news sites, watch some videos or images, revealing what interests us. When leaving home for university or work, we use city cards, applications for renting bicycles or scooters, taxi apps, etc., leaving a trace of from where, where to, and at what times we move. By paying with credit cards, we provide information about our consumption habits as well as our wealth. Wearing smartwatches, we inform what our physical activity and overall condition is. Finally, when expressing our thoughts on social media, we leave information about what we think about and what emotions accompany us. All this constitutes socially relevant data. The course has two objectives. The first is to show the possibilities of using digital data in social research and discuss a particular approach's usefulness and advantages, and disadvantages. The second goal is to introduce the R programming language and show how to carry out basic analyses.

Digital Marketing & Advertising

Academic cycle	Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

Integrates previous courses' studies of audiences, algorithms and analytics to apply to traditional marketing principles according to new media uses. Advances practice with social media campaign development and content curation/creation, Dissects platforms rules, procedures and opportunities to appropriately inform and successfully influence consumer behavior.

Digital Social Networks

Documentary: Watching the World

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The teaching in the course takes place through group learning.

The course will teach critical stages of the documentary making; from getting a good idea for your film, development stage, production and postproduction, distribution and getting maximum exposure for your film.

The course will be based on teacher's films and her own experiences as a producer and director.

During each class students will watch a selected documentary, followed by a discussion about various aspects of the documentary- making process.

Students will be asked to present a story idea for their films and to pass the semester.

The following criteria will lead to the evaluation of their work;

1. What is the quality of the story idea? How clear is the storyline? How original is it?
2. How well is the story researched?
3. What was the quality of the treatment document?
4. How well is the story structured?
5. What is the overall impression of the story? Will it hang together? Will it be memorable?

E-commerce

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Workshop
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

Today, we live in an era of universal internet connectivity and sophisticated consumers. Having an online presence is crucial for any business.

Empowered by technology, consumers extensively research and compare prices and financing offers before they make any major purchase. Researching a company and not finding an established online presence is almost suspicious. E-commerce provides an important platform for advertising and marketing products around the globe and for communication with customers.

During the course, students will choose a niche market to build a functioning ecommerce store with sourced products. Every student will create, plan, build and position a website by conducting market research. We'll use a known ecommerce platform, Shopify, to build a complete e-store. As branding and marketing are an important part of an online store, we'll use professional tools to create necessary visual aids to learn how to enhance the online presence.

During workshops, we will source products, analyze costs and pricing, and create the customer journey to buy products. We'll experiment with various marketing and sales channels - website, social media, Amazon, eBay, etc. Also, we'll mix multimedia content and create stores on several social media channels. We'll ask questions, experiment with different creations.

In this course, we will expose you to best practices, real-life ecommerce stores, pricing and sourcing products, and how to research competitors and curate information.

This is a strictly practical course designed to create a functioning ecommerce business; to learn all the intricacies of running an international online business including product sourcing and pricing in different markets & sales channels.

E-mail and Mobile Marketing

Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The aim of the course is to provide knowledge about gaming and esports, familiarize students with the history and current trends in gaming and esports, familiarize students with the issues of games in the marketing context, mastering the knowledge of the type of games, players, game theory and esports by students.

The aim is to exercise with students of planning esports-based marketing campaigns.

Enabling meetings with practitioners in the field of esports and gaming.

Economy and Society

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Seminar/ Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Winter / Summer

Course description:

It seems a scientific truism to say that every economic decision is also a social one. The aim of the course is to show dynamic processes of interactions between economy and society. The course introduces students to concepts and theoretical tools that are useful to understand the following macro and micro phenomena and processes from a sociological perspective: development of capitalism, adaptation to free-market economy (case of Poland), economic beliefs and a process of system changes. We examine how self-interests, norms, beliefs and social context shape economic decisions of agents and lead to macro-level phenomena. During the course, students are encouraged to conduct their own analyses and develop abilities to understand the socio-economic world.

Economy, Politics and Data

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The proposed course in economics, politics and data aims to familiarize students with the mutual relationships and interdependencies of these three mentioned spheres and manifest their importance for the functioning of modern societies. Each class will contain elements of lecture, during which students will acquire latest state of knowledge, data and statistics describing the discussed phenomena, as well as acquire

the ability to relate this knowledge to understanding the surrounding everyday reality. Each class will also include elements of discussion and reflection, as part of which students will broaden and deepen their understanding of the functioning of cyberspace and the relationships established in it between human and non-human actors. In a sense, the overriding aim of the classes will be to see the so-called big picture, a holistic approach to the functioning of the digital world in its relationship with reality. In particular, students of the Multimedia Communication specialization will have the opportunity to refer to and discuss the above-mentioned issues in the context of digital communication processes.

The semester course will begin with introducing students to the world "datagraphy". The next block of classes will concern what we can name the (overwhelming) power of algorithms. We will pay particular attention to the economic, political and ethical importance of the development of artificial intelligence. The next block will focus on issues of digital disinformation, post-truth and information manipulation in the spheres of economics and politics, along with a number of highly significant practical examples. One of the classes will be devoted to legal aspects and security and misuse of data in the Internet. In the last part of the semester we will focus on the importance of data and data economics for international politics and global relations, also discussing the origin and meaning of the emerging global data politics. During the semester, students will carry out their mini-research projects. The last class will be devoted to their presentation and discussion.

Effective Team Management

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Seminar
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

Teams offer many advantages as an organised way to accomplish tasks. Teams are often fun work experiences. Such enjoyment and satisfaction promotes employee loyalty, motivation, and commitment.

In this course students will learn definition of a team and the different types of teams in organisations. Also students will acquire knowledge on how to build teams in terms of designing the task, selecting the people, and then, the most important thing -managing their relationships. Students will be able to articulate a normative model of optimal decision-making.

EU as a Global Actor: Europe's Power in the Age of Multipolarity

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture
Academic year	2023/2024

Duration	1 semester
Semester	Winter

Course description:

The overall objective of the course is to situate the development of the EU's global 'actorness' in the broader setting of international relations. The module will fuse the study of European integration, international political economy and international relations. It targets students of cultural studies and sociology, as well as those on IR programmes. The module will run as a seminar, meaning a short lecture and active student participation. Students will be provided with detailed reading lists and key questions to guide their reading and research and to enable them to prepare for actively participating and leading discussions. Students will be introduced to the various 'future trends' and 'forward study' reports produced by governments and think tanks to enable them to analyse and interpret the types of political, economic, security-related and demographic trends and developments experts are foreseeing for the future world.

The main content will be divided into four equal parts.

1. Overview of the evolution of EU's external policies in its many dimensions, going beyond the traditional foreign and security policies, consideration of the notions of soft, transformative and normative power.
2. Domains of EU power in a global context: exploration and debate about the role of the EU as a trading power, the EU as a promoter of multilateralism and the rule of law, the EU as an exporter of good governance and stability via enlargement, stabilization and the European Neighbourhood Policy.
3. Analysis of the changing context of international relations, debating the features of globalisation and multipolarity and the EU's position as a regional form of integration.
4. Further analysis of concrete issues, including the rise of the 'BRIC' states, demographic trends, shifts in global economic and trade patterns towards the East and their multifarious implications for Europe and the EU. A further innovative aspect of the module will be its assessment methods; one task will be to produce a podcast reporting on future global trends and implications for the EU.

The students will have a comprehensive understanding of the nature of the EU's external relations and its various expressions and policy manifestations, be able to define and critically analyse a range of global trends and processes and demonstrate an ability to interpret their implications for the EU, understand the specificities of the European model of integration in economic, political and cultural senses.

European Civilization

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The course offers a broad overview of fundamental factors, which had a bearing on constructing modern Europe. Through a series of opposing concepts and their evolution in time (crime/punishment, wealth/poverty, sacred/profane, order/rebellion, etc) a multilayered cultural construct called a civilization will be presented and analyzed. Students will be made familiar with various evolving mindsets

European Economic and Political Integration

Academic cycle	Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

By following this course students will gain:

- (a) A comprehensive understanding of the history of European integration from a variety of perspectives.
- (b) Knowledge regarding the main institutions of the EU.
- (c) A capacity to critically engage in debates relating to the future of European integration.
- (e) Knowledge and understanding of key policy areas and developments on internal and external levels.
- (f) Develop a critical awareness of contemporary EU issues.

By completing the assignments student will:

- (a) Gain the capacity to produce a paper based on a 'policy brief format'.
- (b) Develop their research skills
- (c) Develop their capacities for group work and presentation
- (d) Build confidence to deal with questions and criticisms of their ideas.

Facebook & Instagram Masterclass

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Workshop
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

Summary: The Facebook & Instagram Masterclass will take the student on a deep dive into the newest strategies plus how you can combine the suite of marketing tools Facebook and Instagram provide freely to successfully promote a creator or business online with other online tools to increase engagement. The student will gain an understanding of the platform's video first marketing strategy, content and analysis suites.

Course Description: Meta, previously Facebook (announced on the 28th October 2021 by Mark Zuckerberg) is accessed globally with active monthly users hitting 2.91 billion in 2022 with the largest active age group 31% falling between the 25-34 age category, and 43% female vs 57% male with an average daily consumption of 33 min. Instagram today is accessed by 2 billion users with the largest active users being between 25-34 (31.2%) with 48.4% female, 51.8% male (there is currently no data on other genders for either platform) with an average daily consumption of 29 minutes. These two platforms still dominate the social space with Facebook still coming out as the most popular social media platform although its users are dropping and being steered away to other platforms such as TikTok & Snapchat. This said the power of these two platforms combined with its sister platforms WhatsApp, Messenger, Oculus, Workplace and its audience networks, is enormous and mastering them is a must in our global society. Purpose: To gain a deeper understanding that goes way beyond the surface many marketers stay above, beneath the face value of Facebook and Instagram lays an array of digital tools, marketing scheduling suites and audience definitions that will allow you to turn your visibility, community growth, ROI and authenticity into profitable gains.

Objectives:

Position your product/client by using the appropriate platforms.

Curate catered content specific to influencing your target audience.
Experiment with different techniques according to the latest Apps, Platforms, Rules, and Opportunities to drive engagement.
Practice & perfect platform applications, events, competition strategies for Marketing.
Integrate each specialized platform strategy into one Marketing Plan utilising the whole suite of Apps available.
Measure ROI to persuade client investment strategies.
Acquire and understand analytics to manipulate strategic marketing goals.
Build a following for your personal SMM brand as an Influencer.
Know how to create and optimise your own Social Media Platforms.

Geopolitical Dimension of Energy Security

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The goal of the course is to provide students with a comprehensive knowledge and understanding of links between energy policy (including trade in hydrocarbons, electricity, nuclear and renewable technologies) and security both at the level of key regional actors and globally. First, students will learn about the evolution of the concept of security and the process of “securitization”, which led to making energy-related issues an unquestioned part of security policy. Next, the concept of “geopolitics” will be introduced, so that students understand its original meanings and the current usage in the context of energy policy (which lacks original elements of this notion, but reflects the geography-based nature of energy policy). Subsequently, global energy outlook will be analysed, including the roots of current mix of energy sources, recent trends and prospects for the future. Then major producers, exporters and importers of hydrocarbons will be analysed. This will be followed by presentation of the market in nuclear and renewable technologies. There will be also a presentation of the climate change agenda, as an organising factor of today's energy policy at the global, regional and state-level. A distinctive part of the course will be case studies of Russia, USA and Middle East as world's focus points as regards energy policy and security. Other case studies may be introduced following suggestions from the group. Finally, the role of international cooperation in the field of energy security will be examined, with focus on the European Union as both: policy actor and regulator in the field of energy, and on NATO, which links the military dimension of security with energy-related issues. Please note, in the summer semester 2021/2022 the classes will be held online, via MS Teams.

Global Business Operations and Supply Chain

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

In the process of outsourcing and offshoring that is at the center of economic globalization, the concept of the global value chains (GVCs) has emerged as an important organizational form in the production of goods and services from raw material to end use.

Since GVCs are made up of combinations of organizations that may be only loosely affiliated through various combinations of equity, arm's length, and indirect relationships, the growing length supply chains determine an appropriate organisation, management and long-standing supervision.

The objective of the course is to make students familiar with significant gains to be made if firms manage GVC properly in their business models. However, in order to achieve the goal, students need to have an introduction to the idea of global chain, its benefits, and risks, together with a recent trends in that phenomenon on the global economy.

Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

It is essential that a journalist specializing in world news knows where to find them.

One needs to know where to find the most reliable information from the best informed sources. It is also important to get this information fast and well edited.

A good international reporter must be capable of telling a pure and objective description of facts from a commentary or bias.

These days it is not enough though to rely only on traditional media - TV, press or radio. It is the web that provides a wealth of valuable news but one needs to be able to search for it and to verify the reliability of sources.

Our lectures will walk the students through the world of international media and will provide insights into real stories and issues related to their verification and interpretation.

Globalization Processes

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The "Globalization process" course will deal with the history, development and contemporary aspects of the process. It will assess the waves of globalization process, and their most important drivers, including intensive internationalization of states' relations, wars and periods of peace, and the concept of regional integration, notably the European integration. The course will also analyze the most relevant drivers of the process of globalization, including technology change, emergence of global economy, constraints for and of the nation states, culture, business management, and the security notion. It will strive to show complexities of the issue and its contemporary meanings for daily lives and overall, global prospects.

Humanitarian and Development Aid

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

Why the demand for humanitarian and development aid is constantly growing? Do we have a capacity to cope with it? How to do it? Is the assistance and aid an efficient instrument providing the help to the victims of natural disasters and ethnic, political and armed conflicts or extreme and structural poverty? What are social, economic and personal effects of these two forms of aid? What are constructive examples of correct and successful assistance, which improved the quality of life of the beneficiaries? Which institution is the most efficient in assistance delivery; the UN, the EU, OECD, some NGOs or some rich countries? What they are getting in return? The development aid it is only experiments conducted by rich countries on the poor - or on the contrary- it is a constructive support helping to escape from permanent poverty and substantially improve the life.

In a course of the classes, we will discuss and try answer to all these questions.

We will also analyze the similarities and differences between humanitarian assistance and development aid and evaluate real cases of them. We will discuss how to measure their efficiency and how to tailor them to the specific needs. You will learn to distinguish the assistance from aid and forms of its delivery. You will know the role which assistance and aid play in the areas of armed conflict, refugees' camps and poor regions of Africa, Asia and Latin America. You will be familiar with the use of both instruments in post-conflict areas such as Western Balkans and Western Africa. I will share with you all my field experiences from these two regions. We will be doing a lot of contingency building Training. You became familiar with the core development aid policy of the UN, OECD and the EU as well as with the sharp discussions concerning the

scope and the form of its delivery. We will assess the arguments of Noemi Klein, who is a sharp critic of so-called “Western aid “and we will compare her opinions with others of aid and assistance providers. You will be expected to prepare at home your presentations and evaluations of specific cases and to present them in a course of the discussions, debates and evaluations sessions. The issues of the humanitarian and development aid is not only very important but also fascinating one - and I assure you that both the subject and interactive form of our classes will keep you on the highest level of academic alert.

- Passing on knowledge about communication and management styles in different cultures
- Teaching students how people think and behave in different cultures based on different models of cultures (Hofstede and GLOBE)
- Introducing students to the issue of management in different cultures
- Provide an opportunity to learn own culture from cultural perspective
- Making students familiar with most outstanding cultures
- Teaching people how to cope with representatives of different cultures
- Practising with students gained knowledge on intercultural communication in a workshop.

International Advertising and PR

Academic cycle	Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The major assumption underlying the course is to present the role of advertising & public relations in contemporary organizations operating in multinational environment. During the course it will be outlined to which extent PR affects other areas within an organization. Another topics presented during the course will comprise a contemporary reasoning of public relations, followed by modern techniques and tools applied in modern PR. A special focus will be placed on building PR strategy within an organization in the context of other communication activities carried out within an organization. Respective stages necessary for building successful communication strategy will be outlined and discussed. A strong emphasis will be given to the analysis of the environment in which an organization is operating, as well as interactions and cooperation with stakeholders. In addition to this, a widevariety of available PR tolls enabling for the strategy implementation will be outlined during the course. Practical usage of PR tools will be illustrated with numerous case studies from multinational organizations. Students will be analyzing real strategies and

communication campaigns. On top of that, students will be responsible for planning their own communication strategies and become acquainted with respective PR tools and techniques.

After attending the course students are expected to: recognize the meaning and importance and PR for contemporary organizations; be able to plan communication strategy for an organization; be able to enumerate and apply in practice PR techniques and tools; be able to prepare a plan of PR campaign focused on selected communication goals.

International Economics. Finance

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

We live in a global economy in which international trade and international capital flows are now more important to an economy than it used to be. The subject matter of the course will consist of issues raised by the special problems of economic interaction between sovereign states. The International Economics course provides tools of analysis for understanding international economic relations and evaluating international economic policies. The first half of the course covers international trade issues. Students examine alternative explanations of the pattern of trade among countries and the potential economic gains from trade. The course pays particular attention to differences in technology, the availability of capital, labour and other factors of production, and the existence of economies of scale. It assesses the consequences of policies to restrict international trade and considers possible motivations for protectionist policies that are chosen. The second part of the course is devoted to international finance and covers a broad range of topics including exchange rate determination, monetary and fiscal policy in an open economy, balance of payments crises and the relative advantages of fixed and flexible exchange rate systems. The insights provided by these theoretical frameworks will enable students to discuss topics such as the single currency in Europe, currency crises, government intervention in the foreign exchange market and the role of international factors in a nation's economic performance. The course has five main objectives. It develops an understanding how international trade and financial relations affect consumers, firms, and economic policy. Students learn to critically evaluate the claims of politicians and other policymakers regarding the economic effects of their proposals of macroeconomic policy and international trade. They gain factual knowledge about international trade and finance. Finally, they develop the ability to use a set of theoretical tools that will assist the international professional/business person to make better decisions related to the global economic environment. By working in groups on projects, they also learn about teamwork, managing complex assignments and communicating professionally.

International Economics. Trade

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

International Public Law. Specific Topics

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The main goal: As a tool setting legal frameworks for actions undertaken by states and other actors active within international relations international public law remains of crucial importance for any expert in

international politics or IR. Thus, the main goal of the lecture is to make students familiar with some basic mechanisms of the international public law machinery so that they could understand the mutual interaction between international law as such, (i.e. certain branch of law specifying the rights and duties of states in their mutual intercourse) and international relations, where – during lecture the “law in action” is to supersede the classical discourse focused more upon the “law in the books”. At the end of the course students participating in lectures are supposed to:

- a) Have some basic information on the basic principles and rules of the international law, as applied by states in their day-to-day diplomatic and administrative practice.
- b) Be aware of existence certain limits and minimal standards which must be met so that any action performed by subjects of international law could be classified as a legal one (including so called norm of *ius cogens* problem).
- c) Being aware of existence non-state actors and subjects and have some information on their legal status.
- d) Be able to describe the basic mechanisms of creation of norms of the international public law
- e) Be aware of the complicated problems dealing with the enforcement of international law and to address the main tools of enforcement being applied by states and other subjects.
- f) Have elementary knowledge on the mechanisms of the international judiciary.
- g) Be able to address some basic rules dealing with the diplomatic and consular intercourse.

Methodology: The course based on the interactive relations between students and lecturer. The basic materials used in teaching are treaties, domestic laws and judgements of the courts (international as well as domestic ones). During every lecture some standard reading is placed before students so that they could follow the line of reasoning adopted in the case in question by the decision-makers and judges being in charge to settle a dispute in question.

Introduction to Law

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

This course introduces students to basic legal concepts about the law, its sources, principles and procedures. It is designed to provide the student with an understanding of the structure of Polish, English and European legal system including the role of the judicial, legislative, and executive branches of law, as well as human rights, civic duties, criminal law and some aspects of international law. After the course the student is aware of the basic notions and concept of law as such, has certain knowledge on key legal terms (i.e. legal norm, comity, custom, responsibility, liability, guilt etc.), is able to indicate the key differences between the main legal branches (private, criminal, administrative, state and international law) and knows some basic principles of those branches as well. He/she is aware of the existence of the two big European legal cultures (common law, civil law countries) and can indicate some key differences between the Transatlantic legal communities and Islamic law and the Chinese legal tradition. He/she can explain the key factors stimulating the legal exchange between international law, European law and domestic law of the EU Member States. During the lecture some emphasis will be put on some other question such as the idea of rule of law, some rules of interpretation as well as on mechanism of creation, application, modification and expiration of a legal norm. This lecture is interactive in its character. During the lecture some cases or classical text produced by the top legal scholars are submitted for discussion with the participants. The exam is an oral one. The main idea of the exam is based on a sort of simulation aiming at establishing if a student is able to reconstruct a line of reasoning as adopted on day – to – day basis by state and international organs when settling disputes between individuals, public administration and other actors.

Introduction to Marketing and Sales

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Seminar
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

Marketing focuses on customers. Marketing deals with products, distribution, promotion and price. Marketing builds satisfying exchange relationships. Marketing occurs in a dynamic environment. In this

introductory marketing course, lectures are to be organised around the above fundamental statements. The course aims to give a clear and concise understanding of marketing concepts, problems, processes and applications. Along the course, students will become familiar with the cornerstones of marketing principles such as analysis of marketing environment, consumer behaviour, segmentation, targeting, positioning, brand building, pricing, communications, and marketing research. In the same time, students will have an opportunity to analyse and discuss marketing applications using real-world examples both from the business world and their personal lives.

Introduction to Media and Communication

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

This course will introduce students to the basics in theory and research of mass communication and media. They will learn to think critically about the media as an institution, business and a source of texts important for the society, politics and culture. We will look at the evolution of the mass media, and similarities and differences between so-called "traditional" and "new media". We will try to understand how extensive is the impact of media on us and the societies we live in, and which factors decide about the scope of its impact. Importantly, we will get acquainted with basics of media literacy.

Market Research

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Workshop
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The overall aims of the course in Marketing Research is to teach how to develop a proper conceptual framework for a study, select the right research design and employ common research techniques, in particular focus group interviews and cross-sectional surveys. The contents do not include advanced statistical analysis, which is beyond the scope of the elementary course in Marketing Research, but familiarity with the basics of statistics will be helpful in gaining a deeper understanding of some of the discussed topics. Since Marketing Research is building upon the theory and practice of marketing it is recommended that students are familiar with principles, tools and strategies of marketing. The course aims to present the role, functions, principles and methods of contemporary marketing research with the focus on the survey method supplemented by exploratory qualitative techniques, including focus group and depth interviews. Out of all the stages in the marketing research process, special attention will be given to the phase of planning and designing an effective and efficient research study.

Microeconomics

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The course aims at providing students with an introduction to economic theory that applies to decisions made by consumers and producers within a larger economic system. The course covers basic concepts and approaches needed to undertake the analysis of markets from microeconomic perspective. It introduces economic models and shows how they can be applied to solve real policy issues and problems.

Microeconomy

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

Microsociology

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The focus of this course is on contemporary theories of group processes and micro-sociology. Before introducing theoretical frameworks and specific theories within these frameworks, the concept of scientific theory and its relation to experiment and observation are discussed. Then, after a short discussion of the micro-macro distinction in sociology, four general theoretical perspectives are presented which inform much of contemporary sociology. The course then proceeds to an overview of the more specific theories developed within these frameworks.

Modern Political Systems

Multilateral Negotiations - CC Debating Society

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Workshop
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The aim of this course is to introduce students to the art of formal debating. The course is of relevance to students from any academic background as it is focused on gaining skills and attributes, but also in developing students' knowledge in contemporary and relevant issues international and / or social studies. Learning to debate is all about constructing a strong argument to convince others of the validity of your ideas. Debating, therefore implies being prepared, and having the requisite facts and data to support your views. In today's world, being able to build an argument based on reliable facts and a well honed presentation style is an important and an essential skill in the workplace and at University.

The course has a strong practical character, but will also require students to get to grips with complex ideas and concepts. The module will also expect students to develop their research skills, as participants will need to gather and analyse information, which will then be turned into position papers and eventually speeches. In addition, the course requires students to read and review a book, relevant to the class, to be chosen by the lecturer.

By following the course, students will gain unique insights into debating from practical and theoretical angles. Students will receive instruction on how to build an argument, gather information and craft a position paper. By pursuing this course, students will also finesse their presentation skills and capacity to critically review literature.

Students choose one from the following:

Rutger Bregman 2020 'Human Kind: A Hopeful History' Bloomsbury Publishing

Jeremy Rifkin (2011) 'The Third Industrial Revolution' St. Martin's Griffin

Yuval Noah (2018) Harari '21 Lessons for the 21st Century' penguin / Random House

All three assessment elements are weighted equally.

Negotiations

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The course will address process and nature of international negotiations with focus on conflict resolution and diplomatic practice in armed conflict zones. Students will learn conflict and negotiations theory, legal and formal aspects of diplomatic negotiations but the course will focus on practical approaches to negotiations. Based on the lecturer's experience in conflict-zones (Iraq, Afghanistan) students will learn of various examples of how modern conflicts are resolved (or attempted to be resolved) through negotiations and mediations. Students evaluation will be based on activity during the course and their abilities to write short diplomatic analyses.

Network Theory

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

Non-Governmental Organizations, Social Policy and Development

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The course will examine the key notions connected with non-governmental organizations and social policy. As the proposed topics of particular classes show, the course will discuss, among others, the notion of social policy, social policies, the functions of non-governmental organizations in a society, types of organizations, their funding and problems, volunteering, as well as the concepts of social capital and development. The course will take a form of a lecture, but will include class discussions as well as some students' work between classes.

Organizational Behavior

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description - OBJECTIVES and SUBJECT MATTER OF THE COURSE:

1. To make students acquainted with the E. Schein model of organizational culture and to discuss its elements. Students will analyse organizational cultures of companies from different national cultures in order to be aware how culture influences the way the company is organized, structured and managed.
2. To explain how an organization is functioning based on the model 7S - strategy, structures, systems, skills, staff, and style of management and shared values. In a project of designing a start-up company students will learn how in practice to apply this model and create an organizational culture.
3. To learn motivation theories and HR motivational systems applied in organizations. Students will learn how different aspects of organizational culture shape people's behaviour and motivation.
4. To learn mechanisms of people's behaviour in organization and how they impact the efficiency of organization.
5. To learn how to diagnose an organizational culture and how to model it.

Organizational Methods and Management

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Workshop
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The complexity of internal and external conditions of functioning and development of contemporary enterprises requires a methodical approach to identifying organisational problems and in the sphere of management to managing these organisations. The aim of the course is to acquaint students with organizational and management methods which constitute a basic instrumentarium in the rationalization of decision-making processes.

The course should provide students with practical knowledge of selected methods of organizing, planning and managing the organization. Students will acquire skills to use the learned methods and techniques to solving practical management problems. Classes will be held via MS Teams and a business simulation platform

Organizational Social Media

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The objective of the course is to pass on knowledge about a specific form of journalists activity, that is social media. The course will make students familiar with creating and maintaining professional profiles on social media. Participants in the class will be taught how to prepare such profiles and how to create their own, specific style. They also will be informed about what kind of content should be published to attract users' attention. One of the most important tasks, that students should do, will be preparing and collecting interesting, original content from a variety of sources.

Students will practice writing posts, publishing pictures and short video clips.

Oxford Debates

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Seminar
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The aim of the course is to provide knowledge related to the principles of the Oxford debate. Students will learn how to discuss various topics while maintaining the principles of culture and linguistic correctness, they will work on the use of factual and substantive arguments. In addition, the aim of the course is to teach a better, more complete argumentation of one's position in oral and written statements, to show how rhetorical skills affect the recipients of statements, to direct students that using appropriate tricks you can convince us to something that we disagree with, broaden our horizons and knowledge thanks to the social and cultural topics of debates, showing students that it is possible to discuss with each other culturally and objectively, i.e. without aggression, arguments, with respect for the interlocutor and his views, which are often different from ours.

Personal Branding

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Workshop
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

Photography Workshop

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester

Course description:

Upon successful completion of the course, students can expect to improve their photography by understanding the possibilities and boundaries of the digital equipment. They should gain the knowledge necessary to recognize a good photographic composition, understand light and be able to apply those in practice. They should develop the skills necessary to communicate complex ideas and issues through photography.

They will have an understanding of how to use the most appropriate software to edit, tone and distribute their photographs. Students will learn how to organize, describe and archive their photographs for the future use.

Students will also develop skills and practice in approaching people in real life situations and documenting life and society.

This course is designed to provide students with the foundations necessary for making better digital photographs and using them in journalistic practice.

Political Geography

Political Strategies in a Multipolar World

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The course objective is to study and discuss the notion of "political strategy" principally - but not only - at the state/governmental level in our era that is usually referred to as "multipolar". After looking at the key

terms and at the international setting as it has developed since the end of the Cold War, course participants will study the situation and options of different actor types for influencing the international political environment and reach their policy goals.

From an agency perspective, attention will be paid to both states and non-state actors. On the state side, the key relationship is between the USA as 'outgoing hegemon' and other "big players", as a rule great powers of various domestic outlook and foreign policy goals. Non-state actors comprise essentially transnational corporations, NGOs and - to some extent - the media; these actors all challenge in theory and practice nation states' traditional monopoly of legitimate initiative in the international sphere. In this context will be addressed as well the issue of the relevance of IR theories today, notably of realism and liberalism.

Process Management in the Organization

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Seminar
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The course teaches the importance of business process management (BPM) for organizations and analysis of strengths and weaknesses of existing business strategies and processes and helps students understand the links between them. Students will gain knowledge about mapping, critical thinking, and, basic measurements approaches and learn other ways to analyze, redesign, improve and document business processes.

Business process management revolves around how organizations can be competitive through change management, driving workflow and workload, and improving efficiency. This course will give you the deep insights you need to work in this growing field, learning to analyze and optimize business processes and facilitate change. This course will benefit process improvement specialists, customer service managers and supervisors, business analysts, project and process managers, financial services providers, and IT analysts and managers. The course consists of the contents covering the steps in business process management and their practical implications in the organizations. The topics are 1. Fundamentals of the business processes management. Components of the business process. Types of processes. Business process lifecycle. 2. Process Identification: Focusing on Key Processes, Designing a Process Architecture 3. Practical exercises on designing a process architecture. 4. Business process modeling: Identification of business processes, modeling of business processes, types, and components of models 5. Process discovery: Discovery Methods, Evidence-Based Discovery, Interview-Based Discovery, workshop-based Discovery 6. Qualitative Process Analysis: Value-Added Analysis, Root Cause Analysis, Issue Documentation, and Impact Assessment 7. Quantitative Process Analysis: Performance Measures, Flow Analysis, Queues. 8. Process Redesign: The Essence of Process Redesign, Product-Based Design, Creating a Product Data Model, Deriving a Process from a Product Data Model 9. Putting BPM to Work for Your Organization 10. Improving BPM with Operational Decision Management 11. Looking at BPM Success Stories in the Real World 12. Information technologies in the business process management.

Process Optimization Methods, Lean Management, TQM

Academic cycle	Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Workshop
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The aim of the course is to provide students with knowledge and basic practical skills in the field of production and business process management methods using Lean Management and TQM techniques. Students will learn the history of the emergence of Lean Management and TQM and the principles which govern these methodologies, as well as their place in the overall management processes of enterprises. They will become acquainted with cases of implementation in various areas of business, favourable and unfavourable conditions for the application of these methods. The course involves a meeting with a TQM practitioner. Students will have the opportunity to practice the basic methods of optimising management processes in the form of participation in simulation training games.

Professional Standards vs Propaganda Agents

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

In modern journalism, you have to push you a way hard avoiding commercial and political (propaganda) pressures and searching for the truth while upholding basic professional standards of the decent journalist. All news outlets have their noble guidelines but the very same stations and newspapers often violate the rules themselves in order to be able to earn more money through adverts, get more clicks or viewings and to survive in the modern mediajungle. This workshop will teach you what to expect in a typical journalistic workplace. Concrete situations, simulations, tests, videos and anecdotes. The professional standards theory does not translate easily into practice. Having worked at BBC in London, Radio Zet, Przekroj Weekly, Newsweek and Gazeta Wyborcza Daily and recently some tabloids, I will be happy to share with you practical survival skills in this area and many tricks of the trade, which I have learned the hard way in the past three decades.

Project Implementation, Control, Monitoring System

Academic cycle	Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The objective of the class is to prepare students for planning and managing projects in real business context. Students will learn about project planning and implementation as well as about launching changes and monitoring and control. In course of the classes students learn also about agile methodologies. Having finished the class a student will be able to plan, implement and manage a project in a business environment.

Project Management

Academic cycle	Bachelor's degree and Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter / Summer

Course description:

Project Management is recognized as one of the fastest growing professions today. Project Management Course provides the basics of the topic by introducing essential project management concepts and methods. This course provides essential knowledge and skills for efficient and effective management of projects. It covers the fundamentals of project management from project planning, execution and monitoring to management, and concludes with soft issues in project management. It consists of a combination of lectures, case analysis and group discussions. At the end of the course, students would understand and articulate the importance of Project Management in any business project and would be equipped with essential skills and know-how to manage a project.

Project Management Methods - agile

Academic cycle	Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The purpose of the course is to familiarize the students with foundations of agile methods in project management with particular focus on characteristics of teams following Scrum.

Secondly, the participation in the course will allow for the comparative study of agile and waterfall project approaches.

Lastly, industry best practices will be shared around effective ways of using and adopting Agile project approaches in daily project operations.

Project Management Methods - sequential

Academic cycle	Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

Introduction to the project management and techniques of working in the project.

During this part, students will gain basic knowledge related to the project management, such as cycles of the project, methods related to the preparation of the project as well as crucial techniques of working in the project.

Methodology of the project management – Prince2, PMBOK and introduction to the IT methodologies.

During this part, students will be introduced to the basic methodologies, that are common in the modern companies. What is more, on the basis of these methodologies, students will be analyzing case studies, preparing work breakdown structures and will apply critical path method.

Leadership in the project management – relations in the team, motivation of the team, conflict management, as well as methods for proper work organization.

This part will be focused on delivery to the students' knowledge that is related to the proper construction of the project team. Several characterological profiles will be discussed. What is more, student will be ask to analyze their own profiles, and on such a basis will try to form the best possible team among them.

Budget of the project – techniques for budget preparation and management accounting.

This part of the course will be strongly focused on practical aspects, such as proper division of the costs in the project. High emphasis will be put on the requirements that have been established by National Center of Science and Research.

Profitability accounting and financial analysis of the project.

This part of the course will be focused on such aspects as analysis of the possible financial output of the project, using standard evaluation methods, such as Net Present Value, Internal Rate of Return or Payback period. Agile management methods (Scrum, Kanban, Extreme Programming or others).

During this part of the course, students will be introduced to the most commonly used agile methods, that are used in the IT-based companies. Several case study analysis will be provided, that will be then compared to the standard PM methods.

Risk Management – basic methods for risk analysis in the project.

Students will be introduced to the methods that allow for proper risk influence analysis.

Presentation and discussion over the projects that have been prepared by students.

During this part, students will present case studies of the project that they are willing to conduct, together with discussion in the class.

Public International Law

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The main aim of the course is to make students familiar with some basic mechanisms of international law. During the course the students work with the most important documents being in force, notably UN Charter and Vienna Convention on the Law of Treaties then they discuss judgments of international or domestic courts so that they could understand how the theory finds application on day-to-day practice. Even if the course is construed so that to encompass all fundamental problems of the contemporary international law, still the main focus is put on the topic of sources of international law, as well as the role of the UN System. Thus the final result of each class is to make students understand the basic line of reasoning adopted by organs when applying the international law as well as to make them aware how the international law may influence the domestic politics and international relations in general.

Public Relations

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The main goal of Public Relations program is to provide students with the knowledge of ethical and reliable communication's management and transparent rules concerning the creation of the company's image.

Public Relations Program consists of:

- Internal Relations
- External and Media Relations
- Corporate Social Responsibility Projects
- Crisis Communication Management
- Social Media Relations

During the program students will have an opportunity to analyse real life case studies of Public Relation activities of companies from different market sectors... Additionally, the program leading as a workshop, will give a chance to practice the creation of Public Relations strategies and image-plans. Students equipped with various PR techniques & tools will have a chance to develop necessary skills & competences for successful PR activity.

Quantitative Data Analysis (SPSS/R)

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The aim of the course is to familiarize students with IBM SPSS Statistics software and other programs for the analysis of standardized data. Students will learn the basics of the program during the classes and will be able to interpret and present the obtained research results. Participation in classes will allow students to use in practice the skills and knowledge acquired on other courses related primarily to statistics and methodology of social research. Knowledge from other sociological classes will help students to interpret the results obtained and present them in a broader context. Participation in classes will also be an opportunity to learn about the most important sources of social data that will be used by students during the course. As part of the course, students will be introduced to the basic functions of the R language.

Quantitative Methods and Statistics in Business

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Workshop
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

This course of Quantitative Methods and Statistics focuses on a. analysis and interpretation of data that is acquired by means of business research and b. presentation of the research results. During the course students will acquire essential skills that every business analyst must possess: they will learn to read, structure and present the original data, they will learn to run some specific analyses, so they can arrive to sound, data-driven conclusions, which will eventually lead to the right decisions for business. Moreover, for every assignment, special attention will be given to the manner of data and results are presented and if they were presented to the client.

One of the two software solutions used during the class is Microsoft Excel which is available in virtually every organization. Real-life business data will be used during the course (sales, revenues, etc).

Course description:

The Research Methodology course introduces students to the range of methods within social and political sciences. It provides firsthand experience with the specific procedures through which social science knowledge is developed. It emphasizes the interaction between theory and research. The emphasis will be on general procedures and on concrete techniques.

Students will be expected to work in groups and carry out a small scale research project wherein they generate and analyze data, or work with data already available from some surveys. Teaching will take the form of a mixed lecture and workshop format (project driven).

This course will: (1) familiarize students with social research methods, (2) offer "hands on" experience to some of the methods discussed in class, (3) offer an opportunity to select a reading source of interest to critically engage with its methods (to complete BA/MA), (4) write an original research proposal to address a particular research project, and (5) test some useful methods and briefly present the results to the rest of the classmates. Upon completion of this course students will be able to conduct a small-scale research project that is methodologically informed and understand the general principles and methods involved in doing social research.

Students will do the following group tasks:

1. Write a research project proposal (1,500 words)
2. Give class presentations on the progress of their research (at least once in the term)
3. Submit a final group research report (4-5,000 words by 16th Jan. 2018)

Assessment: Student achievement of the stated course objectives will be measured in the form of (1) class presentation/assignments (2) student participation (3) and a 4-5,000 word research project report to be done by a group of 2 students.

Sociological Theories

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture

Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The course is designed to introduce students to the sociological theoretical perspectives and to demonstrate how it can be used to analyze contemporary social problems.

As we examine these social problems, it will become apparent that there are many different perspectives on what can be defined as a social problem and on the causes of and solutions to social problems. The will offer an opportunity for a critical discussion of the usefulness of sociological perspectives in understanding the complexity of contemporary social life.

In the course, we will examine such problems as inequality, poverty, crime, alcohol and drugs, education. The primary goal of this course is to enable you to approach and analyze social problems and related public policies from a sociological perspective.

Specific objectives of the course:

Understand the sociological perspectives and use them to analyze contemporary social problems.

Apply sociological theories as a way to understand various problems and their causes and effects.

Apply sociological analysis of social problems to policy making and its outcomes in society.

Encourage critical thinking, analysis, and synthesis.

Sociological Theories - workshop

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

1 making students familiar with sociological theories from classical authors (Marx, Weber, Durkheim) to more modern theories (consumerism, social capital)

2 learning to read original theoretical texts and make sense of their content

3 providing an opportunity to discuss the most vibrant, important, and (hopefully) interesting theories concerning various social phenomena and finding their relevance for student's own life.

Sociological Thinking in Practice

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024

Duration	1 semester
Semester	Winter

Course description:

The aim of the course is to make students familiar with the basic sociological concepts: society, culture, socialisation, social control, interaction, social structure, risk society. Current problems like radicalisation will also be discussed. The classes are based on a discussion of corresponding social and sociological problems. Students will be asked to prepare two presentations. One presentation is based on photo essays, which are results of the very first students' fieldwork. To be successful students are obliged to be very well familiar with obligatory readings assigned to a class.

Sociology and Societies of Post-Modernity

Academic cycle	Master's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

Sociology of Postmodernity can be understood on two levels: theoretical and analytical. We will analyse cultural and social dimensions of postmodernity, looking closer at the phenomenon such as consumerism, simulation, risk, technology, ideologies, identity, family and body. Each of the phenomenon is to be shown from the perspective of post-modern sociological theory. It will allow us to challenge Lyotard's claim about the end of big narratives, as well as to make attendees familiar with a modern sociological thinking basis on the contemporary examples.

Sociology of Digital Society

Academic cycle	Master's degree
Language	English

Socio-political Geography of Terrorism

Academic cycle	Master's degree
Language	English
ECTS credits	3
Hours	30
Course type	Elective / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The seminar is designed to deepening the understanding of a) the roots of terrorism, b) the trends in the development of terrorism as well as c) the globalization of terrorism. We will analyze the Global Terrorism Index and the social and economic factors nourishing extremism. We will study examples of current conflicts (incl. 'lesser-known' conflicts and regions such as Central Sulawesi or West Papua). In addition, the students will be invited to make an attempt to assess the risk posed by terrorism in selected countries and to discuss the question of effectiveness of counter terrorism policies, both at national and global level. As the roots of the modern terrorism we are facing today can be traced back to the 70's and 80's we will also take a look at historical background and activities of selected terrorist organization.

Statistics for Social Research

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Workshop
Academic year	2023/2024

Duration	1 semester
Semester	Winter

Course description:

Statistics plays many important roles in sociology, such as (a) providing tools for building probabilistic models of social processes,

(b) providing tools for summarising data from surveys and experiments, or (c) providing tools for making inferences about population parameters. The present course focuses on the last two uses of statistics. Further, the use of statistics in science can be divided into (a) providing theoretical justification for statistical measures and (b) providing practical rules for applying the measures to a particular research problem. The present course puts greater emphasis on the latter.

The course begins with a presentation of the concepts of statistical variable and statistical distribution and goes on to discuss the common descriptive statistics summarising the center and the dispersion of the distribution. Also, because quantifying association between social phenomena is at the heart of data analysis in sociology, the concept of statistical association and various measures of association will be presented in some detail. The final part of the course will be concerned with issues of statistical inferences from a sample to a population.

All classes are to take place in a computer lab, so that the students can learn how to use common statistical software (e.g., MS Excel) to perform simple statistical computations.

Statistics for Social Sciences

Strategic Games

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Workshop
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

Workshops are based on a classical strategic game named Diplomacy. It is best played by seven players. Each player represents one of the seven Great Powers in the years prior to World War. In that period Europe was a complicated cauldron of political intrigue. You are about to travel back to those times and change the course of history in favor [from Manual]

On a map you can find cities, which can supply armies of its owners. The aim of a game isto control more than a half of the cities in Europe.

All players simultaneously give their orders, after 15 minutes of a negotiation phase. Personal contact between players and easy rules make the game enjoyable and, very often, exceedingly exciting...

The objective of this course is to:

- develop students' strategic way of thinking
- make them familiar with mechanisms of negotiations
- practice with students some basic methods of solving militaryproblems.

Strategic Management

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

To succeed in the future, managers must develop the resources and capabilities needed to gain and sustain advantage in competitive markets—traditionaland emerging. The way in which organizations attempt to develop such competitive advantage constitutes the essence of their strategy. The Strategic Management Course focuses on identifying and understanding the sources of superior firm performance. This course introduces theoretical concepts and frameworks useful for analyzing the external and internal environment of the firm, and guiding the formulation and execution of different types of strategies. Strategic issues are examined from the perspective of a chief executive or general manager, focusing on how they can formulate effective strategies and develop the necessary resources and capabilities to achieve sustainable competitive advantage in a global and volatile competitive environment.

Strategic Studies

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The objective of the course is to teach students a basic knowledge of the strategy and its applications in international relations. The purpose of the course is also to make students familiar with the most important historical and contemporary thinkers and their influence on national policies. The students will gain knowledge about various institutions and organizations, national and international, responsible for policy and implementation of national strategies and policies. We will debate also the application of strategic approaches in the private sector, as well as discuss the new fields in which strategic approaches need to be formulated for the future.

Strategy and Planning

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Seminar
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

Strategy and planning relate to both the fundamentals of marketing and online marketing.

The item is divided into several fundamental areas:

1. Creating a strategy
2. Business strategy vs digital strategy
3. Strategic analysis
4. The process from brief to campaign monitoring
5. Lessons learned

This course will allow students to analyze and create a digital strategy. They will then guide you through the process of preparing your strategy in practice. After completing the course, students should have knowledge of creating a strategy and be able to use it in practice. The latest trends in qualitative KPIs of the campaign will also be discussed.

ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The focus of the course will be the discussion on the nature of modern warfare and armed conflict. We will discuss the causes, process, and outcomes of war and the challenges connected with returning to the state of peace. We will have a chance to make ourselves familiar with the changing nature of the conflict (and discuss which elements of conflict evolve and which stay the same). We will introduce the subject of asymmetrical conflicts, namely those involving nation-states and non-nation states (e.g., insurgencies, terrorist organizations, secession movements) brought about in the last few decades have brought to the fore the problems and will examine some of its problems. We will also deal with the aftermath of warfare, including the reintegration of the veterans of wars.

Web Analytics and User Experience

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

According to market trends, digital is where business happens. Therefore, digital presence of any brand is of high importance. As a future manager or business owner, you will need skills that will allow you to understand your online business data and ask the right questions. In addition, you need to be able to unfold how your digital presence supports your desired results, not only for financial but also for your customer's experience. This is where this course will help you succeed, thanks to the knowledge of web analytics and user experience.

Working as a Foreign Correspondent

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

This course will be focused on the practical aspects of working as a foreign correspondent. I have some experience to impart, and we will be drawing upon the experiences of other correspondents based in Warsaw as the course progresses, but I want you all to get in the mindset that as of next week, you are all Warsaw-based correspondents too. All you need to be a correspondent is intellectual curiosity, personal integrity, a brain and a pen/laptop. Assuming you all already have those things, I want you all to be on the lookout for stories - political, cultural, social, whatever you think is interesting. What the course will help you to do is gain knowledge of the process of how you turn those ideas into pitches, those pitches into commissions and ultimately, those commissions into published/printed stories (and, of course, cash).

In practice, this means that the homework I set you will be relatively light, but I will expect you to do some practical work - researching issues, interviewing people etc - every week between classes. Every week we will discuss a different thematic/theoretical aspect of work and life as a correspondent, but we will also be working collaboratively to help each other develop their ideas and work. By the end of the course, we should have produced more than enough material to 'publish' our own little newspaper or magazine.

Workshop of Critical Reflection: Analysis of Philosophical and Socio-Political Texts

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5

Workshop: Creative Writing

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial

Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The objective is to prepare students for the difficult task of coming up with interesting topics for features, conducting targeted research, writing and editing an excellent copy. Based on several topical books from the field of journalism, including Harrower classic bestseller textbook "Inside Reporting" - students will also learn the theory which will come handy when choosing their angle within the gender and starting work in a newspaper/magazine. Students will be presented with a series of lectures enhanced by examples and practical exercises as well as typical workshop tasks.

Workshop: In-Depth Reporting

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The objective of this course is to teach students how to find stories, develop a reporting strategy, conduct research and interviews, choose an appropriate story form and write in-depth pieces for use in print and online media outlets. The emphasis will be on students writing their own stories. By the end of the course, students will plan, research, write and file two in-depth pieces -- a feature and profile -- and participate in several other projects involving teams of fellow students.

Students will become familiar with a variety of feature forms. They will monitor a variety of media and analyze examples of in-depth reporting by professional journalists and fellow students, as well as complete smaller writing assignments in class.

Workshop: Investigative and Political Reporting

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The objective of the course is to:

- sharing the knowledge about the peculiarities of political and investigative journalism.
- getting students familiar with the principles of functioning of the public relations industry, so that they learn how to avoid manipulation by private and public organizations
- introducing to students the concept of information war
- introducing to students the ideas of the new paradigm, produced by the social media and the “post truth” era
- teaching students how to interpret political language and differentiate the forms of political communication
- teaching students the ethic of journalism, related to political and investigative fields
- getting students familiar with proper sources management
- enabling the students to talk to a practitioner in the field of political journalism
- providing an opportunity to discuss the issues, related to different study cases of journalistic investigation and problem they raise.

Workshop: Lifestyle Journalism

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

The course is being prepared.

Workshop: Opinion Writing

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The objective of the course is to pass on knowledge about a specific form of journalists activity, that is opinion/commentaries writing. The course will make students familiar with the different forms of opinion writing, characteristics of this media activity and its importance in shaping readers' views. Participants in the class will be taught how to prepare the opinion article, how to write it and how to shape their own style. It especially means teaching them to collect facts from a variety of sources and evaluating them. Students will practice writing following the rules, paying special attention to the title, lead and structure of the article.

Workshop: Radio Feature

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Elective / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The main objective is twofold - to present and practice the main rules of writing for the radio as well as familiarize students with simple recording, editing tasks. This will allow them to build a radio package. This is not an easy task. Students will learn (revise) their skills to record decent quality sound using microphones. They will be also expected to learn the basis of Audacity editing application. They will have to read two books on the style appropriate for the radio. Practical aspects of effective dramatic, clear writing will be discussed and trained. Students will also have listened and conducted analysis of several radio packages. Radio package preparation involves research and collecting sound material - a phase which will be discussed in detail.

Workshop: Real Time Journalism

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Seminar
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

Main aim of this course is to get the students aware of what it takes to be prepared for working efficiently in the real time online environment. Trends such as real time, big data, social media, multichannel, micro-moments and changing customer demographics will be explored and explained during lectures and workshops.

Students will also learn what new skills and technologies are to be acquired to become the modern journalist, who is part artist and part scientist. We will deep-dive into the models that change viewers needs and behaviours in the attention economy such as: social gene, zero moment of truth and liquid content. As the result they will be able to fully understand

Workshop: Research

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Tutorial
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

Research sounds, well... boring. Yet it is not! And it presents the most essential part of any journalist's work. You can be very gifted but with no research you are no good! During my classes I will teach you how to do fascinating research that produces great topics and great pieces for the newsroom, newspapers and magazines. You will get to grips with „magnifying glass“ technique, you will learn about stages and the practicalities of good research. Knowing what you look for IT is easier to find, isn't it? You will get practical knowledge, Some tricks of the trade, complete tasks in the class and at home. You will acquire theory but only as much as necessary. This workshop I have been doing for some time is result of my 28 years research practice in radio and printed journalism. I will be happy to show you videos, examples of concrete work and output. You will be provided with well established methods to move on fast with your research while remaining focused on the goal: an ideal news item, an interesting programme or article.

World Economic History

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The objective of the course is to provide students with an overview of economic history as a key dimension of (human) historical development in general, regarding the provision of all kinds of physical and material resources needed to sustain human existence. The economy has always been inextricably linked with social and political organisation and development, and so must be taken into consideration for representations of any stage of human history. Many, if not most major historical developments cannot be properly understood without accounting for economic factors. This starts out from the (also) economic nature of people and their resulting activities to develop and improve their economic situation.

The course will discuss, in a widely chronological order, landmarks of economic development throughout history, with particular focus on the modern era. Among other things shall become visible how the world in

its spatial and societal dimensions, which includes international relations, has developed as a result of economic history. This includes changes in inter-regional relations over the centuries.

While the principal perspective of the course is historical and empirical, some key approaches in economic theory and the emergence of economics as an academic field will be addressed, too, as they reflect the growing interest of scholars, entrepreneurs and politicians in the theoretical foundations of their actions and the

Indeed, the attitude towards economics has always been one major element of comprehensive ideologies such as liberalism, conservatism and socialism.

In its final part, the course will address the current state of the world economy and possible prospects.

World History 1914-1956

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Lecture
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The course examines world events in the first half of the 20th century. When the First World War began empires covered the globe; it was said that 'the sun never set' on the British Empire. The First World War destroyed that order forever. The interwar period saw the creation of new independent nation-states but it also saw the rise of ideologies from fascism to communism. The Second World War, the most destructive in human history, ushered in an era of independence for some (India, the creation of Israel) but also saw increasing nuclear tension and a Cold War between the two new 'Superpowers'. The Cold War touched every region of the globe from the Middle East to Indo-China; from Africa to Europe. The course examines key events of the post war world in the context of the struggle between east and west - from the Korean War to the Bandung Conference to the Hungarian Revolution of 1956.

World History since 1956

Academic cycle	Bachelor's degree
Language	English
ECTS credits	5
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Summer

Course description:

This course concentrates on key global historical events after 1956, from the division of Europe with the building of the Berlin Wall to the Cuban Missile Crisis and the Vietnam War. It focuses on the history of the Middle East from the Arab-Israeli conflict to the increasing importance of oil to world politics. It looks at the cultural upheavals of 1968 and examines the genesis of the European Union. The Soviet invasion of Afghanistan heralded intensification of the arms race as well as the rise of Solidarity. 1989 saw the collapse of the Soviet Union and eastward expansion of NATO and the EU. The course looks at the end of the 'Superpowers' and the increasing importance of China, India and other areas. It looks at recent events in Ukraine and examines the possibility of 'another Cold War'.

World Social History (XXth and XXIst Century)

Academic cycle	Bachelor's degree
Language	English
ECTS credits	3
Hours	30
Course type	Obligatory / Lecture with Discussion
Academic year	2023/2024
Duration	1 semester
Semester	Winter

Course description:

The course aims to familiarise students with key events and developments in social relations in the XXth and XXIst centuries, notably those of global significance, or in other words, such that illustrate the interconnectedness of nations/societies in this phase of the modern era. Throughout, social history should be understood to be closely connected with political, cultural and intellectual history.

As many developments had their wider origins already in the XIXth century as the age of industrialisation and modernisation, this period will as well be addressed to some extent. In the XXth century, key drivers of - rapid - social change were in particular the two World Wars and their effects on the social, economic and political order, which favoured the rise of radical, antiliberal movements. The Cold War turned out to be another context allowing for different kinds of modernisation, both inside societies and at the international level.

Since the end of the bilateral conflict in 1990, the world has again become more complex. Globalisation and the UN process have supported economic integration and the questioning of national borders. Although nation states remain the most important political actors, multinational corporations and international organisations work towards the creation of some kind of global society. This raises the question of what social relations might look like in the future, and at which levels they will develop.
